School children moves Delhi HC for direction not to hold sports events during peak pollution time

NEW DELHI: (Nov 17) A group of school students have approached the Delhi High Court seeking a direction to ensure that tournaments and trials for outdoor sports are not scheduled in the capital during the peak pollution months of November to January and are held during a safer time when air quality is better.

The minors, who have filed the petition through their parents, said they actively participate in state scheduled sports tournaments, camps and trials in Delhi and other parts of the country.

They said it is scientifically established and judicially noticed fact that Delhi faces an annual public health emergency during the winter months and the scheduling of the school, inter-zonal, state and national level sporting events in the city around this period is increasingly becoming a major health issue for children participating in such events.
